PROSPECTUS

CDM PRIMARY & JUNIOR SECONDARY SCHOOL

LILA, ADAMAWA STATE

Brief History of The School

In 1992, there was no educational facility for the thousands of people living on the Julvu Mountains in Mubi North Local Government of Adamawa State, North-East Nigeria. CDM Foundation Inc started the first Primary School in Lila in 1992 to serve more than 7 villages of the Julvu people. By 2002, the Primary school became fully recognized and registered by the Government and students came from nearby villages to attend the primary school.

Upon completion of their Primary education however, the nearest secondary school the pupils could proceed to in pursuit of a secondary education was the Government School in Muchalla, several hours and many villages away, yet without a boarding facility. To make it easy for the pupils to proceed to secondary school, the CDM Foundation created a private free boarding facility in Muchalla for her pupils who proceeded to secondary school in Muchalla.

For several reasons, not all the pupils who complete their primary education are able to leave their community and environment in pursuit of a secondary education.

In 2019, the CDM Junior Secondary School was started in Lila to make quality secondary education accessible to every child irrespective of their family circumstance.

THE GOAL OF THE SECONDARY SCHOOL IS TO PROVIDE AN OPPORTUNITY FOR EVERY PUPIL TO HAVE ACCESS TO QUALITY SECONDARY EDUCATION WITHIN THEIR REACH.

We provide a co-education learning facility where our students can pursue their dreams and reach for greatness right from where they are.

Community School. Global Outlook

We are located in a rural community with no electricity and social amenities. Most of our students come from homes with non-educated parents and who mostly cannot afford decent tuition. Our school is funded by a joint effort from the community and from donations made to our parent foundation, yet we look forward to being able to provide world class and competitive education and exposure to our students.

CDM Secondary School seeks to be the bridge that will connect all our students to the world, irrespective of background and disadvantages.

talent is equally distributed. opportunity is not.

LEILA JANAH

We seek to make opportunities available, even on the Julvu Mountains.

Our Focus

The areas we seek to thrive and stand out as a school

Academics: We seek to give every student school a solid and rigorous academic foundation that enables them discover their unique learning patterns and be able to thrive in any learning environment they find themselves in the future.

Technology & Innovation: We desire to move our students from being technology consumers to becoming contributors to global innovation. We hope to introduce them to leading technologies and inspire them to explore local creative opportunities to tinker with and create solutions using technology.

Arts & Creativity: We seek to be a school that discovers the creative talents in each student and to help them develop it, while seeking to connect them to opportunities for expression both locally and globally.

Sports: we seek to develop and integrate a very strong sports program into our curroculum that helps our students channel their energies in the right direction, developing their talents and increasing their chances of both scholarships and global visibility.

Faith & Community: we have a very strong Christian programme integrated to all our activities. However, we are not just concerned about producing professing Christians, but people who are able to apply their faith to every sphere or life and who can apply all their learning to solving real problems in the local community and at a global scale.

Admissions are currently open only into JSS 1

Admission Requirements

1. Students should have completed Primary School
2. Write and pass our entrance exam or pass an oral interview
3. Live in proximity to Lila, Julvu (we do not have boarding facilities)

School Leadership Team

Naphtali Richards
School Administrator & Lead Teacher
